# Safety Data Sheet

# conforming to Regulation (EC) No. 1907/2006 titanium dioxide

Date: 17.05.2021 Version: 2.7 Supersedes version: 2.6

#### 1 IDENTIFICATION OF THE SUBSTANCE AND OF THE COMPANY

1.1 Product identifier	
Substance name	titanium dioxide
Trade name	Titanium Dioxide pigmental, grades SumTITAN R-204, SumTITAN R-2041, SumTITAN R-206, SumTITAN R-2061, SumTITAN R-2071, SumTITAN R-208
ES#	236-675-5
CAS name	Titanium (IV)oxide
CAS#	13463-67-7
Molecular formula	O2Ti, TiO2
This substance is not classified according Regulation (EC) No 1272/2008 (CLP).	to Article 59 (10) of the REACH Regulation and Annex VI to
REACH registration No	01-2119489379-17-0029
1.2 Relevant identified uses of the sub-	stance or mixture and uses advised against
Identified uses	Agents adsorbing and absorbing gases or liquids Colouring agents, pigments Fillers Intermediates Laboratory chemicals Odour agents Semiconductors and photovoltaic agents Photosensitive agents and other photo-chemicals Catalyst supports, delustrants
Uses advised against	none
1.3 Details of the supplier of the safety	
Manufacturer	Public Joint-Stock Company SUMYKHIMPROM Kharkivska str., Sumy, Ukraine, 40003
Only Representative	ZANGAS Hoch- und Tiefbau GmbH Polina Konstantinova Schwindgasse 5/1/4, Vienna, 1040, Austria, E-mail P.Konstantinova@zangasgroup.com +43 1 274 16 366
Responsible person	Manufacturing Director Mr. O. V. Denschikov E-mail: stand@sumykhimprom.org.ua
1.4 Emergency telephone number	
+38(0542) 683-550, +38 (0542) 674-260	– 24 hours

#### **2 HAZARDS IDENTIFICATION**

2.1 Classification of the substance	)						
Classification according to Regulation (EC) No 1272/2008 [CLP/GHS]		Self classification	Additional information				
-	-		-				
Human Health effects							
Inhalation	Inhalation of dust may cause discomfort. Inhalation exposure to large amounts may cause a temporary drying effect or irritation of mucous membranes. Exposure to dust may lead to aggravation of pre-existing upper respiratory and lung diseases.						
Eyes	Inert foreign body hazard						
Skin	Prolonged contact may result in scaling/irritations due to drying of						

# Safety Data Sheet conforming to Regulation (EC) No. 1907/2006 titanium dioxide

Date: 17.05.2021 Version: 2.7 Supersedes version: 2.6

	the skin and/or mechanical abrasion related to skin-to-clothing			
	contact or skin-to-skin contact.			
Swallowing	The classification criteria according to regulation (EC) 1272/2008 as specific target organ toxicant (STOT) repeated exposure, oral are not met since no reversible or irreversible adverse health effects were observed immediately or delayed after exposure an the no observed adverse effect level (NOAEL) via oral applicatio is above the guidance value for a Category 1 classification of 10 mg/kg bw/day and above the guidance value for a Category 2 classification of 100 mg/kg bw/day. For the reasons presented above, no classification for specific target organ toxicant (STOT) repeated exposure, oral is required.			
2.2 Label elements				
Product identifier	titanium dioxide (TiO2) EC Number: 236-675-5 CAS Number: 13463-67-7			
Hazard pictograms				
Signal word	No signal word			
Hazard statements	-			
Precautionary statements	-			
2.3 Other hazards				
none

#### **4 FIRST AID MEASURES**

4.1 Description of first aid measures				
General information	Provide rest, warm conditions, comfortable position, fresh air availability, free air access. In case of sickness call for medical help			
4.2 Most important symptoms and effe	cts, both acute and delayed			
In case of inhalation	Take out to fresh air, rinse nasopharynx with drinking water.			
In case of eye contact	Rinse with running tap water.			
In case of skin contact	Take off and dispose of contaminated cloths, shoes, ammunition. Rinse with running tap water till the product complete removal.			
In case of ingestion	Rinse the mouth thoroughly. Allow to drink plenty of water. In case of sickness call for medical help.			
Information to physician	In case of ingestion :allow to drink plenty of water, take activated carbon, purgative.			
First aid arsenal	Universal medical kit with a set of drugs (in consultation with the medical department of the enterprise).			
4.3 Indication of any immediate medical attention and special treatment needed				
When exposed there is no need to seek immediate medical attention				

#### **5 FIRE-FIGHTING MEASURES**

5.1 Extinguishing media		
Suitable extinguishing media	Use any means suitable for extinguishing surrounding fire	
Unsuitable extinguishing media	Do not scatter spilled material with high pressure water streams	
Chountable extinguishing media	in case of large fire.	
5.2 Special hazards arising from the substance or mixture		
Hazardous combustion products	none	
Special protective equipment for fire-	As in any fire, wear a self-contained breathing apparatus in	
fighters	pressure demand, MSHA/NIOSH (approved or equivalent), and	
nginers	full protective gear.	
Advice for fire-fighters	Use extinguishing media appropriate for surrounding fire.	
Additional information	-	

#### **6 ACCIDENTAL RELEASE MEASURES**

6.1. Personal precautions, protective equipment and emergency procedures					
Percend prescutions	Avoid dust formation. Use personal protection means as				
Personal precautions	stated in the section 8.				
Emergency procedures Collect in dry manner, avoid dust formation.					
6.2 Environmental precautions					
Prevent dust dispersal into environment. Prevent the product ingress into surface and soil waters.					
6.3 Methods and material for containment and cleaning up					
Use valid mechanical means of cleaning (vacuum, sweeping).					
6.4 Reference to other section					
No dangerous substances are released.					
See Section 7 for safe handling.					
See Section 8 for information on personal protection equipment.					
See Section 13 for disposal information.					

# Safety Data Sheet conforming to Regulation (EC) No. 1907/2006 titanium dioxide

Date: 17.05.2021 Version: 2.7 Supersedes version: 2.6

#### **7 HANDLING AND STORAGE**

7.1 Precautions for safe handling	
Precautions for safe handling	Avoid aerosol formation when handling. Apply respiratory organs, eyes and skin individual protection means. Premises mechanical ventilation, utilization of dust and gas purifying equipment, equipment in pressurized version. In the event of casual substance discharge: collect in dry manner into container, equipped with cover and marking, avoid dust formation.  Contaminated surface should be washed with water with detergents.
Fire preventions	None, as product has no flammable properties. See section 5.
Aerosol and dust generation preventions	Use local exhaust ventilation or other appropriate engineering controls to maintain exposures below occupational exposure limit.
Electrostatics prevention	As a matter of good prastice take measures to prevent the build up of electrostatic charge, such as ensuring all equipment is electrically grounded.
Safe transporting	Adhere to the rules on the transport of goods, which operate for the appropriate type of transport.  Not violate the integrity of container.  During loading works execute instructions and rules for the appropriate works.
Advice on general occupational hygiene	Do not eat, drink and smoke in work areas, wash hands after use, remove contaminated clothing and protective equipment before entering eating areas.
7.2 Conditions for safe storage, include	
Technical measures and storage conditions	Store in manufacturer's package in dry area where it is safe from contamination and exposure to rain, snow and subsoil water.
Packaging materials	Package should exclude moisture penetration and guarantee the safety of the product during transportation and storage.
Requirements for storage rooms and vessels	Special requirements for storage structures are not established. Protect from moisture.
7.3 Specific end use(s)	
none

soil	100 mg/kg soil	10	Extra	polation method: assessment factor		
sewage treatment plant	100 mg/L	mg/L 10		polation method: assessment factor		
oral	1667 mg/kg 30 food		on the which during the Residual safety	No data are available for toxicity to birds. The PNEC oral is based on the key study on chronic repeated dose oral toxicity for rats, in which rats were fed ad libitum with corn oil with 50000 mg/kg TiO2 during 103 weeks (National Cancer Institute, 1979). According to the REACH Guidance on information requirements and chemical safety assessment (Table R.10-13), an assessment factor of 30 should be applied to a chronic NOEC for oral toxicity to mammals. This results in a PNEC oral of 1667 mg TiO2/kg food.		
8.2 Exposure controls						
Occupationa	al exposure	controls				
Appropriate engineering controls		Use sufficient ventilation to keep employee exposure below recommended limits.				
Respiratory protection		Use dust respirator according to the EN149.				
Eye/face protection		Use safety dust proof eyewear: safety goggles according to EN166.				
Skin protection		Use protective clothing. Hand protection- gloves. Use Neopren or PVC gloves according to EN374 (protection class 3 and higher). Penetration time is more than hour.				
General hygiene considerations		Wash hands and face thoroughly with mild soap before eating and drinking. In facilities, where titanium dioxide is handled, eating and food storage are not permitted.				
Environmen	tal exposui	re controls				
Measures to prevent exposure			In air and wastewater the product doesn't form any toxic compounds in the presence of other substances or factors.			
Consumer e	xposure co	ntrols				

#### 9 PHYSICAL AND CHEMICAL PROPERTIES.

Measures related to consumer uses of additional measures are not required.

the substance

STITIOIOAE AND STEMIOAET NOT ENTIES.			
9.1 Information on basic physical and chemical properties			
Appearance	white powder		
Odour	Odourless		
Odour threshold	not applicable		
pH	not applicable		
Melting point/range (°C)	1843°C for rutile		
Initial boiling point/range (°C)	Boiling point of titanium dioxide is ca. 3000 °C.		
Flash point (°C)	not applicable		
Evaporation rate	not applicable		
Flammability	not applicable		
Vapour pressure	not applicable		
Relative density	rutile=4.26 g/cm <sup>3</sup>		
Water solubility (20°C in g/l)	insoluble (below the LOD of 1 µg/L at pH 6, 7 and 8)		
Explosive properties	not applicable		
Oxidising properties	not applicable		

# Safety Data Sheet conforming to Regulation (EC) No. 1907/2006 titanium dioxide

Date: 17.05.2021 Version: 2.7 Supersedes version: 2.6

9.2 Other information	
none	
10	STABILITY AND REACTIVITY
10.1 Reactivity	Not reactive under regular storage and use conditions.
10.2 Chemical stability	Stable under recommended storage and handling conditions. In case of emissions into atmosphere the substance doesn't form toxic compounds.
10.3 Possibility of hazardous reactions	None under normal processing.

#### 11 TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects.		
Toxicokinetics, metabolism and distribution		
Non-human toxicological data no bioaccumulation potential		
Information on toxicological effects		

Acute toxicity titanium dioxide					
Exposure	Value	Exposure time period	Species	Method	
oral: gavage	LD50: > 5000 mg/kg bw	Acute	rat (Crl:CD(SD)) female	OECD Guideline 425 (Acute Oral Toxicity: Up-and-Down Procedure) EPA OPPTS 870.1100 (Acute Oral Toxicity)	
inhalation (whole body)	LC50 (4 h): > 6.82 mg/L	Acute	rat (ChR-CD) male	Hall, G.T. (1979a)	

	Skin	not irritating
Irritation	Eye	not irritating
	Respiratory tract	not irritating
Respiratory or skin sensitisation	not sensitising	•
Germ cell mutagenicity	assays, in vitro gene mu as in vivo. All tests show dioxide does not require properties. The classification criteria	en tested in bacterial reverse mutation tation and clastogenicity tests as well a negative response, thus titanium classification for mutagenic a acc. to regulation (EC) 1272/2008 as also not met.
Carcinogenicity	germ cell mutagen are also not met.  In lifetime inhalation studies rats were exposed for 2 years to respective 10,50 and 250 mg/ m3 of respirable TiO2. Slight lung fibrosis was observed at 50 and 250 mg/ m3 levels.  Microscopic lung tumours were also observed in 13 percent of the rats exposed to 250 mg/ m3, an exposed level that caused lung overloading and impairment of rat lungs clearance mechanisms.  In further studies these tumours were found to occur only under particle overload conditions in a uniquely sensitive species, the rat, and have little or no relevance for humans.	

# Safety Data Sheet

Supersedes version: 2.6

Version: 2.7

Date: 17.05.2021

exposure was also found to be much more severe in rats than in other rodent species. In February 2006, IARC has re-evaluated Titanium dioxide as pertaining to Group 2B:" possibly carcinogenic to humans", based upon inadequate in humans and sufficient evidence in experimental animals for the carcinogenicity of titanium dioxide. IARC evaluation guidelines consider the generation of tumours, in 2 different studies within the same animal species, to be adequate criteria for an assessment of sufficient evidence. The conclusions of several epidemiology studies on more than 20000 TiO2 industry workers in Europe and the USA did not suggest a carcinogenic effect of TiO2 dust on the human lung. Mortality from other respiratory diseases, was also not associated with exposure to TiO2 dust. It is inappropriate to base the evaluation of titanium dioxide as a suspect carcinogen solely on the observation that rats develop lung tumours under condition of lung particle overload, since such tumours induced in rats by inert poorly soluble particles such as titanium dioxide are widely considered as unreliable predictors of hazard to humans. Overall, the epidemiological evidence from well-conducted investigations has not shown that exposure to titanium dioxide is correlated to any detectable carcinogenic potential for humans. Based on the weight of evidence from the available long-term toxicity/carcinogenicity studies in rodent and the relevant **Toxicity for reproduction** information on the toxicokinetic behaviour in rats it is concluded that TiO2 does not present a reproductive toxicity hazard.

Repeate	Repeated dose toxicity						
titanium	titanium dioxide						
Exposure	Value	Exposure time period	Species	Method			
	NOEL: 24000 mg/kg bw/day	29 consecutive days. (daily)	rat (Crl:CD (SD)IGS BR)	OECD Guideline 407 (Repeated Dose 28-Day Oral Toxicity in Rodents)Mayer T.W.; et al. (2006)			
inhalation	NOEC (for carcinogenicity in rats): 50 mg/m³ air (male/female) NOEC (non-neoplastic changes): 10 mg/m³air (male/female)	up to 2 years (6 hours/day, 5 days/week)	rat (Crj: CD(SD)) male/female	combined repeated dose and carcinogenicity (inhalation) (whole body) 10.6 ± 2.1 mg/m³ (analytical conc.) 50.7 ± 6.65 mg/m³ (analytical conc.) 250.1 ± 24.7 mg/m³ (analytical conc.) ## Safety Data Sheet

# conforming to Regulation (EC) No. 1907/2006 titanium dioxide

Date: 17.05.2021 Version: 2.7 Supersedes version: 2.6

#### 12 ECOLOGICAL INFORMATION

12.1 Toxicity				
Aquatic toxicity	Effect dose	Exposure time	Species	
Acute toxicity to fish	LC50 > 1000 mg/L	96 h	Pimephales promelas	
Acute toxicity to aquatic invertebrates	EC50 > 1000 mg/L	72 h	Daphnia magna	
Acute toxicity to aglae	EC50 62 mg/L	72 h	Pseudokirchnerella subcapitata (algae)	

#### 12.2 Persistence and degradability

#### Abiotic Degradation

Half-time	Method	Remark
Biodegradation	Degradation/biodegradation testing metal compounds like TiO2, whic co	

#### 12.3 Bioaccumulative potential

Results from analysis of elemental Ti in plants and corresponding soil or sediment samples indicate to absence of bioaccumulation of Ti in plants. Reliable BSAF factors for plants vary between 0.000 - 0.0008 kg/kg

#### 12.4 Mobility in soil

Does not form toxic compounds in air or sewage water, in presence of other substances or TiO2 factors. Is not transformed in environment.

#### 12.5 Results of PBT and vPvB assessment

According to Annex XIII of regulation (EC) 1907/2006 a PBT and vPvB assessment shall not be conducted for inorganic substances.

#### 12.6 Other adverse effects:

none

#### 13 DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods			
Appropriate disposal / Product	The product is non-hazardous to be buried in economical or sanitary settlers.		
Waste codes / waste designations according to EWC / AVV	No hazardous wastes as per 2000/532/EC.		
Appropriate disposal /Packaging	Upon absence of possibility for recycling or utilizing, wastes and tare should be liquidated in accordance with national and local legal regulations.		

#### 14 TRANSPORT INFORMATION

14.1. UN number	Not applicable
14.2. UN proper shipping name	Not applicable
14.3. Transport hazard class(es)	Not applicable
14.4. Packing group	Not applicable
14.5. Environmental hazards	Not applicable
14.6. Special precautions for user	Not applicable
14.7 Transport in bulk according to	Not applicable
Annex II of MARPOL73/78 and the IBC Code	Not applicable

## Safety Data Sheet

# conforming to Regulation (EC) No. 1907/2006

	the product is transportable by all kinds of vehicles in
	accordance with transport regulations, active for the given kind
14.8 Additional information	of transportation. The cargo is not classified as dangerous one
	in accordance with international carriage regulation.
	The marking «Prevent from moisturising» is mandatory.

#### 15 REGULATORY INFORMATION

# 15.1 Safety, health and environmental regulations/legislation specific for the substance EU regulation

Product conformance to the requirements of Resolution by European Council AP (89) 1; Commission Regulation (EC) No. 10/2011; European Packaging Directive 94/62/CEE; Requirements of the Restriction of Hazardous Substances (RoHS) EU 863/2015; Regulation (EC) No 1935/2004

#### Other regulations

Product conformance to the requirements of DIN EN 71, part 3 "Toys safety, migration of separate elements", as of August 2018, category III; Requirements of Administration on sanitary supervision for foods and pharmaceutics quality (FDA) (21CFR 178.3297); Standard GB 9685-2016 «National Food Safety Standard. Standard for Uses of Additives in Food. Contact Materials and Their Products».

#### 15.2 Chemical Safety Assessment

none

#### **16 OTHER INFORMATION**

Relevant R- , H-, EUH-phrases	none
Abbreviation	PEL - permissible exposure limit OEL – occupational exposure limit REL – recommended exposure limit DNEL - derived no-effect level PNEC - predicted no effect concentration LD50 – lethal dose LC50 – lethal concentration EC50 - half maximal effective concentration NOAEL - no observed adverse effect level PBT or vPvB - persistent, bioaccumulative and toxic or very persistent very bioaccumulative
Training instructions	The given document is targeted for personnel, dealing with the product carriage and utilization, with the purpose to learn the safety handling rules.
Further information	Persons, subjected to the given document delivery, may undertake the independent estimation of the product appropriateness for their own needs. The user bares responsibility for appropriateness check and information integrity for his specific application sphere.  The manufacturer will be grateful for sending the information about the product utilization, to undertake the extended risks evaluation, at the address indicated on page 1.

# Safety Data Sheet

conforming to Regulation (EC) No. 1907/2006 titanium dioxide

Date: 17.05.2021 Version: 2.7 Supersedes version: 2.6

#### **EXPOSURE SCENARIOS ACCORDING TO CHEMICAL SAFETY REPORT**

Since titanium dioxide is neither classified as dangerous nor does it meet the criteria as a PBT/ vPvB substance, no exposure assessment is required (see REACH Art 14(4) (a) in conjunction with Annex I Section 0.6 (5) of regulation (EC) 1907/2006.)
