

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

### 1. IDENTIFICATION OF THE MIXTURE AND OF THE COMPANY

<b>1.1 Product identifier</b>	
<b>Mixture name</b>	Inorganic macronutrient fertilizer grades NPK, NP
<b>Trade name</b>	SuperAGRO
<b>ES No.</b>	unavailable
<b>IUPAC</b>	unavailable
<b>CAS No.</b>	unavailable
<b>Molecular formula</b>	Unavailable
<b>REACH pre-registration No</b>	-
<b>REACH registration No</b>	see section 3
<b>1.2 Relevant identified uses of the substance or mixture and uses advised against</b>	
<b>Identified uses</b>	Granulated holding nitrogen, phosphorus and potassium compound fertilizer. Is applied on soils of all types for general application and in rows, to nourish during vegetation, under all agricultural crops: in the event of grain crops sowing, under technical crops, when soil re-digging in autumn and spring, under perennial fruit trees when planting or for nutrition purposes in early spring and after flowerage, in hotbeds and greenhouses. May be utilized to prepare fertilizer mixtures.
<b>Uses advised against</b>	none
<b>1.3 Details of the supplier of the safety data sheet</b>	
<b>Manufacturer</b>	Public Joint-Stock Company SUMYKHIMPROM Kharkivska str., Sumy, Ukraine, 40003
<b>Only representative</b>	ZANGAS Hoch- und Tiefbau GmbH Polina Konstantinova Schwindgasse 5/1/4, m. Vienna, 1040, Austria E-mail <a href="mailto:P.Konstantinova@zangasgroup.com">P.Konstantinova@zangasgroup.com</a> +43 1 274 16 366
<b>Responsible person</b>	Manufacturing Director Mr. O. V. Denschikov E-mail: <a href="mailto:stand@sumykhimprom.org.ua">stand@sumykhimprom.org.ua</a>
<b>1.4 Emergency telephone number</b>	
+38(0542) 683-550, +38(0542) 674-260 – 24 hours	
<b>Additional information</b>	
If the emergency medical aid is necessary, turn to your local medical establishments	

### 2. HAZARDS IDENTIFICATION

<b>2.1 Classification of the mixture</b>		
<b>Classification according to Regulation (EC) No 1272/2008 [CLP/GHS]</b>	<b>Self classification</b>	<b>Additional information</b>
-	-	-
Substances in the mixture do not meet the classification requirements of the current European legislation on classification and labelling № 1272/2008 (except for Calcium-Ammonium Nitrate (CAN)- class 2A (H319))		
<b>Human Health effects</b>		
Product is safe if its use guidance is observed. Low-hazard substance which doesn't cause acute poisoning. It can be harmful in case of:		
<b>Inhalation</b>	Large doses may cause dryness of the mouth and respiratory disorder.	
<b>Eyes</b>	Large doses may cause lachrymation (tears), heating and conjunctivitis.	
<b>Skin</b>	Single exposure won't produce irritation. Prolonged exposure in some instances may cause dermatitis to develop.	

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

<b>Swallowing</b>	Causes irritation to the gastrointestinal tract. Symptoms may include nausea, vomiting and diarrhea.
<b>2.2 Label elements</b>	
No labeling required for the product	
<b>2.3 Other hazards</b>	
none	

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

<b>Mixtures</b>						
<b>Ingredient name</b>	<b>EC No.</b>	<b>CAS No.</b>	<b>Concentration, range %</b>	<b>Classification</b>	<b>Pre-registration/ registration number</b>	<b>Index number</b>

#### 4. FIRST AID MEASURES

<b>4.1 Description of first aid measures</b>	
<b>General informations</b>	Provide rest, warm conditions, comfort position, fresh air availability.
<b>4.2 Most important symptoms and effects, both acute and delayed</b>	
<b>In case of inhalation</b>	Take out to fresh air. If breathing is difficult, provide humid oxygen or carbogen; if not breathing, give artificial respiration.
<b>In case of eye contact</b>	Immediately wash the eyes with clean drinking water (within 15 minutes), lifting the upper and lower eyelids. Remove contact lenses, if any, prior to it. Turn to physician if the irritation persists.
<b>In case of skin contact</b>	Remove contaminated clothing, shoes and outfit. Flush the contaminated skin with running water until the skin is clean.
<b>In case of ingestion</b>	Never give anything by mouth to an unconscious person. Flush the oral cavity free of the substance, provide plenty of drinking, induce vomiting, and give charcoal, saline purge. Get medical attention.
<b>Information to physician</b>	Treat symptomatically and supportively.
<b>First aid arsenal</b>	Universal medical kit with a set of drugs (in consultation with the medical department of the enterprise).
<b>4.3 Indication of any immediate medical attention and special treatment needed</b>	
Immediate first aid attention is not expected	

#### 5. FIRE-FIGHTING MEASURES

<b>5.1 Extinguishing media</b>	
<b>Flammable properties</b>	Non-flammable, non-explosive, see section 9.
<b>Suitable extinguishing media</b>	Use any means suitable for extinguishing surrounding fire.
<b>Unsuitable extinguishing media</b>	Do not scatter spilled material with high pressure water streams in case of large fire.
<b>5.2 Special hazards arising from the substance or mixture</b>	
<b>Hazardous combustion products</b>	Ammonia, phosphorus, nitrogen and sulphur oxides
<b>Special protective equipment for fire-fighters</b>	Wear full protective clothing and NIOSH-approved self-contained breathing apparatus in case of large fire.
<b>Advice for fire-fighters</b>	During a fire, irritating gases may be generated by thermal decomposition or combustion. Mixture is noncombustible.

#### 6. ACCIDENTAL RELEASE MEASURES

<b>6.1. Personal precautions, protective equipment and emergency procedures</b>	
<b>Personal precautions</b>	Wear appropriate personal protective equipment as specified in Section 8 Do not touch or walk through spilled material.
<b>Emergency procedures</b>	Pick up spills and place in a suitable container for disposal, using a method that does not generate dust. Ventilate area of leak or spill. Keep unauthorized personnel away.
<b>6.2 Environmental precautions</b>	
Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system. Dilute with plenty of water. Do not allow to enter sewers/ surface or ground water.	
<b>6.3 Methods and material for containment and cleaning up</b>	
Sweep or vacuum up and place in an appropriate closed container.	

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

Avoid generating dust.  
 Cover large powder spill with plastic sheet or tarp to minimize spreading. Clean up residual material by washing area with water and detergent. Collect washings for disposal.

#### 6.4 Reference to other section

Information about personal precautions - see Section 8. Information about waste disposal - see Section 13.

## 7. HANDLING AND STORAGE

7.1 Precautions for safe handling	
<b>Precautions for safe handling</b>	Avoid excessive generation of dust Avoid direct or prolonged contact with skin and eyes. Do not ingest.
<b>Fire prevention</b>	None, as product has no flammable properties. See section 5.
<b>Aerosol and dust generation prevention</b>	Use local exhaust ventilation or other appropriate engineering controls to maintain dust exposures below occupational exposure limit
<b>Electrostatics prevention</b>	As a matter of good practice take measures to prevent the build up of electrostatic charge, such as ensuring all equipment is electrically grounded.
<b>Safe transporting</b>	Adhere to the rules on the transport of goods, which operate for the appropriate type of transport. Not violate the integrity of packaging. During loading works execute instructions and rules for the appropriate works.
<b>Advice on general occupational hygiene</b>	Do not eat, drink and smoke in work areas, wash hands after use, remove contaminated clothing and protective equipment before entering eating areas.
7.2 Conditions for safe storage, including any incompatibilities	
<b>Technical measures and storage conditions</b>	Store in manufacturer's packaging in closed ventilated warehouses, at air temperature maximum 40 °C or on the site, protected from direct sunlight and atmospheric precipitations, separated from incompatible products (see par.10).
<b>Packaging materials</b>	Package should exclude moisture penetration and guarantee the safety of the product during transportation and storage.
<b>Requirements for storage rooms and vessels</b>	Special requirements for storage structures are not established. The product is to be stored at normal humidity environment.
7.3 Specific end use(s)	
none	

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

<b>DNELs (Derived No-Effect Level)</b>				
<b>Substance name</b>	<b>DNEL/DMEL</b>	<b>Exposure route</b>	<b>Exposure frequency</b>	<b>Remark</b>
Ammonium Sulphate	11,167 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Ammonium Nitrate	37,6 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Ammonium dihydrogenorthophosphate	6,1 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Diammonium hydrogenorthophosphat	6,1 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Potassium Chloride	1064 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Carbonyldiamide (urea)	292 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Calcium sulfate	21,17 mg/m <sup>3</sup>	inhalation	Long-term exposure	
Boric acid	8,3 mg/m <sup>3</sup>	inhalation	Long-term exposure	

<b>PNEC values:</b>	
<b>Substance name</b>	<b>PNEC (Predicted No-Effect Concentration)</b>
Ammonium Sulphate	PNEC = 0.312 mg/L freshwater PNEC = 0.0312 mg/L marine water PNEC=0.53mg/L intermittent release PNEC=16.18 mg/L STP
Ammonium Nitrate	PNEC = 0.45 mg/L freshwater PNEC = 0.045 mg/L marine water PNEC= 4,5mg/L intermittent release PNEC=18 mg/L Sewage treatment plant
Ammonium dihydrogenorthophosphate	PNEC = 1.7 mg/L freshwater PNEC = 0.17 mg/L marine water PNEC=17 mg/L intermittent release PNEC=10 mg/L STP
Diammonium hydrogenorthophosphat	PNEC = 1.7 mg/L freshwater PNEC = 0.17 mg/L marine water PNEC=17 mg/L intermittent release PNEC=10 mg/L STP
Potassium Chloride	PNEC = 0.68 mg/L freshwater PNEC = 0.068 mg/L marine water PNEC= 6.8mg/L intermittent release PNEC=10 mg/L STP
Carbonyldiamide (urea)	PNEC = 0.047 mg/L freshwater PNEC = 0.047mg/L marine water
Calcium sulfate	PNEC=100 mg/L STP
Boric acid	PNEC =2.9mg/L aqua (freshwater) PNEC=2.9mg/L aqua (marine water) PNEC =10mg/L STP

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

8.2 Exposure controls	
Occupational exposure controls	
<b>Appropriate engineering controls</b>	Running drinkable water must be supplied to the production facilities. Storage of foodstuff and eating in the substance processing area are forbidden.
<b>Respiratory protection</b>	Use dust respirator according to the EN 149 equipped with the dust recovery filter according to the EN 143.
<b>Hand protection:</b>	Protective gloves according to EN 374.
<b>Body protection</b>	Cotton suit or another protective suit and protective footwear according to EN 344.
<b>Eye/face protection</b>	Wear dust-proof glasses according to the EN 166.
<b>Skin protection</b>	Use protective clothing.
<b>General hygiene considerations</b>	Emergency eyewash and safety shower should be in close proximity as a matter of good practice. Wash hands and face thoroughly with mild soap before eating and drinking.
Environmental exposure controls	
<b>Measures to prevent exposure</b>	The product won't produce toxic compounds in air and wastewaters in the presence of other substances or agents. The substance half-life - 30-7 days.
Consumer exposure controls	
<b>Measures related to consumer uses of the mixture</b>	Additional measures are not required.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties	
<b>Appearance</b>	Granules of gray or light pink colour (as per the customer's requirements, may be of other colour).
<b>Odour</b>	weak specific
<b>Odour threshold</b>	Not determined
<b>pH</b>	6,5 (1 : 10 water solution)
<b>Melting point/range (°C)</b>	197 (DAP, MAP), 280 (Ammonium Sulphate), 772 (Potassium Chloride) 135 (CAN)
<b>Initial boiling point/range (°C)</b>	Could not be determined, decomposes immediately after melting.
<b>Evaporation rate</b>	not applicable
<b>Flammability</b>	not applicable
<b>Upper/lower flammability or explosive limits</b>	not applicable
<b>Vapour pressure</b>	does not form vapour in standard conditions.
<b>Vapour density</b>	does not form vapour in standard conditions.
<b>Relative density</b>	not applicable
<b>Water solubility (20°C in g/l)</b>	soluble in water
<b>Viscosity</b>	study technically not feasible
<b>Explosive properties</b>	non explosive
<b>Oxidising properties</b>	non oxidising
9.2 Other information	
No other information	

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

### 10. STABILITY AND REACTIVITY

<b>10.1 Reactivity</b>	The product is chemically inert.
<b>10.2 Chemical stability</b>	The product is stable in due conditions of utilization and storage.
<b>10.3 Possibility of hazardous reactions</b>	none
<b>10.4 Conditions to avoid</b>	Prevent from heating. Under the influence of external heat sources at over 1000C, diammonium phosphate and urea, included in the fertilizer, are decomposed with emitting of ammonia gas phase. The product is hygroscopic, absorbs atmospheric moisture from air.
<b>10.5 Incompatible materials</b>	Strong oxidizers, strong alkali.
<b>10.6 Hazardous decomposition products</b>	Ammonia; phosphorus, nitrogen and sulphur oxides.

### 11. TOXICOLOGICAL INFORMATION

<b>11.1 Information on toxicological effects.</b>					
<b>Toxicokinetics, metabolism and distribution</b>					
<b>Non-human toxicological data</b>		<p>Phosphates are absorbed from the gastrointestinal tract as orthophosphate. The transport of phosphate from the lumen is an active, energy-dependent process, and there are factors that appear to modify the degree of its intestinal absorption. Vitamin D stimulates phosphate absorption, and this effect has been reported to precede the action of the vitamin on transport of calcium ion. In general, about two thirds of the ingested phosphate is absorbed from the gastrointestinal tract in adults. Absorbed phosphate is almost entirely excreted into the urine. After ingestion, ammonium ions can be absorbed by diffusion of the unionized ammonia or by active transport of ammonium ion. After intestinal absorption, ammonium ions are converted to urea by the liver, and subsequently excreted in urine.</p> <p>In aqueous media, ammonium sulfate dissociates in the ammonium and sulfate ions (NH<sub>4</sub><sup>+</sup>, SO<sub>4</sub><sup>2-</sup>). These can be taken up into the body by the oral and respiratory routes. Absorbed ammonium is transported to the liver and there metabolized to urea and excreted via the kidneys. Ammonium is also an endogenous substance that serves a major role in the maintenance of the acid-base balance. Sulfate is a normal intermediate in the metabolism of endogenous sulfur compounds, and is excreted unchanged or in conjugated form in urine.</p> <p>It is highly probable that calcium sulfate particles that have reached certain tissues in the organism are eliminated after few weeks, since their solubility in the biological environment seems to be much higher than the solubility of, e.g., quartz.</p>			
<b>Human toxicological data</b>		No human information is available			
<b>Information on toxicological effects</b>					
<b>Acute toxicity:</b>					
<b>Substance name</b>	<b>Exposure</b>	<b>Value</b>	<b>Exposure time period</b>	<b>Species</b>	<b>Method</b>
Ammonium sulphate	oral	LD50 >4250 mg/kg bw	acute	rat	OECD guideline 425
	dermal	LD50 >2000 mg/kg bw	acute	rat	OECD Guideline 402
	inhalation	LC50 = 1 mg/L air	acute	rat	Phalen et al., 1980
Ammonium nitrate	oral	LD50 >2950 mg/kg bw	acute	rat	OECD guideline 401

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

	dermal inhalation	LD50 >5000 mg/kg bw LC50 > 88.8 mg/L air	acute acute	rat rat	OECD Guideline 402 Phalen et al., 1980
Ammonium dihydrogenorthophosphate	oral	LD50 >2000 mg/kg bw	acute	rat	OECD guideline 425
	dermal inhalation	LD50 >2000 mg/kg bw LC50 = 5 mg/L air	acute acute	rat rat	OECD Guideline 402 OECD Guideline 403

	dermal	LD <sub>50</sub> >2000 mg/kg bw	acute	rat	OECD Guideline 402
	inhalation	LC50 >2.03mg/L air	acute	rat	OECD Guideline 403

<b>Irritation</b>	<b>Skin</b>	Not irritating
	<b>Eye</b>	Not irritating
	<b>Respiratory tract</b>	No information available: not required. Based on available data, the substance should not be classified in accordance with Directive 67/548 / EC and the Order of the CLP for acute oral, dermal and inhalation toxicity.
<b>Respiratory or skin sensitisation</b>	Not sensitizing No reliable study with substances contained in the mixture is present. A reliable LLNA study showed no sensitisation of substances contained in the mixture.	
<b>Germ cell mutagenicity</b>	Negative No reliable Ames and chromosome aberration studies with substances contained in the mixture are present.	
<b>Carcinogenicity</b>	In accordance with column 2 of REACH Annex X, no carcinogenicity study needs to be proposed substances contained in the mixture is not genotoxic.	
<b>Toxicity for reproduction</b>	However, reliable data available on substances contained in the mixture shows a NOAEL for reproduction toxicity after oral exposure of rats of >1500 mg/kg bw/day. Based on the toxicity profile, the properties of the NH <sub>4</sub> <sup>+</sup> and phosphate ions and the tolerable intake of phosphorus, the overall conclusion is that no additional studies are considered necessary.	
<b>STOT-single exposure</b>	No data available	

<b>Repeated dose toxicity:</b>				
<b>Substance name</b>	<b>Exposure</b>	<b>Value</b>	<b>Exposure time period</b>	<b>Species</b>
Ammonium sulphate	oral	NOAEL: 256 mg/kg bw/day	chronic	rat
	inhalation	NOAEC: 300 mg/ m <sup>3</sup>	subacute	rat

<b>STOT-repeated exposure</b>		No data available		

## 12. ECOLOGICAL INFORMATION

<b>12.1 Ecotoxicity:</b>			
Product dust may cause atmosphere contamination. Large quantities introduced into water may cause damage to aquatic organisms as well as cause their destruction. It doesn't form other substances or toxic compounds factors in air and in sewage.			
<b>Aquatic toxicity:</b>			
No sufficient and reliable data for product hazards valuable valuation for water habitat, but there are fertilizers essential ingredients water toxicity study results:			
<b>Aquatic toxicity</b>	<b>Effect dose</b>	<b>Exposure time</b>	<b>Species</b>
<b><i>Ammonium sulphate</i></b>			
Acute toxicity to fish	LC50 > 53 mg/L	96 hour	Oncorhynchus mykiss
Acute toxicity to aquatic invertebrates	EC50 =121.7 mg/L	48 hour	Daphnia
Acute toxicity to algae	EC50=2700 mg/L	18 days	Chlorella vulgaris
<b><i>Ammonium Nitrate</i></b>			
Acute toxicity to fish	LC50 > 447 mg/L	48 hour	Oncorhynchus mykiss)
Acute toxicity to aquatic invertebrates	EC50 =490 mg/L	48 hour	Daphnia
Acute toxicity to algae	LC50 > mg/L	10 days	Chlorella vulgaris
<b><i>Ammonium dihydrogenorthophosphate</i></b>			
Acute toxicity to fish	LC50 > 85.9 mg/L	96 hour	Oncorhynchus mykiss
Acute toxicity to aquatic invertebrates	EC50/LC50 = 1790 mg/L	72 hour	-
Acute toxicity to algae	EC50/LC50 > 100 mg/L, NOEC = 100 mg/L	72 hour	Selenastrum capricornutum
<b><i>Diammonium hydrogenorthophosphat</i></b>			
Acute toxicity to fish	LC50 =1700 mg/L	96 hour	-
Acute toxicity to aquatic invertebrates	EC50/LC50 = 1790 mg/L	72 hour	-
Acute toxicity to algae	EC50/LC50 > 100 mg/L, NOEC = 100 mg/L	72 hour	Selenastrum capricornutum
<b><i>Potassium Chloride</i></b>			
Acute toxicity to fish	LC50 =880 mg/L	96 hour	Pimephales promelas
Acute toxicity to aquatic invertebrates	EC50= 177 mg/L	48 hour	Daphnia
Acute toxicity to algae	EC50=1337 mg/L	120 hour	Nitzschia linearis

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

<i>Carbonyldiamide (urea)</i>			
Acute toxicity to fish	LC50 > 6810 mg/L	96 hour	-
Acute toxicity to aquatic invertebrates	EC50/LC50 = 10000 mg/L	72 hour	Daphnia
Acute toxicity to algae	EC50/LC50 > 100 mg/L, NOEC = 100 mg/L	72 hour	Selenastrum Capricornutum
<i>Calcium sulfate</i>			
Acute toxicity to fish	LC50 > 100 mg/L	96 hour	Oryzias latipes
Acute toxicity to aquatic invertebrates	EC50 > 100 mg/L	48 hour	Daphnia
Acute toxicity to algae	EC50 > 100 mg/L ,NOEC< 100 mg/L	72 hour	Selenastrum Capricornutum
<i>Boric acid</i>			
Acute toxicity to fish	LC50 =447 mg/L	96 hour	Oncorhynchus kisutch
Acute toxicity to aquatic invertebrates	EC50 = 319.8mg/L	24 hour	Daphnia
Acute toxicity to algae	NOEC>=10 mg/L	96 hour	Chlorella pyrenoidosa
<b>12.2 Persistence and degradability</b>			
<b>Abiotic Degradation</b>			
In accordance with REACH Annex XI, testing may be omitted if testing does not appear scientifically necessary. No hydrolysable group is present. Simple inorganic salts such as phosphates and sulphates are not susceptible to photo degradation.			
<b>Biodegradation</b>	No data are available: not required and for inorganic substances not reliable to estimate		
<b>12.3 Bioaccumulative potential</b>			
Simple inorganic salts with high aqueous solubility will exist in a dissociated form in an aqueous solution. Such a substance has a low potential for bioaccumulation.			
<b>12.4 Mobility in soil</b>			
As inorganic compounds, traditional degradation studies are not applicable. Due to the water solubility and the ionic nature, the substances are not expected to adsorb or bioaccumulate, water is the main target compartment, and the substance will not volatilize from soil.			
<b>12.5 Results of PBT and vPvB assessment</b>			
According to Annex XIII of Regulation (EC) No 1907/2006, no PBT and vPvB assessment has been conducted for inorganic compounds.			
<b>12.6 Other adverse effects:</b>			
none			

### 13. ISPOSAL CONSIDERATIONS

<b>13.1. Waste treatment methods</b>	
<b>Appropriate disposal / Product</b>	Waste disposal in strict correspondence with the state and local laws and regulations.
<b>Waste codes / waste designations according to EWC / AVV</b>	None, waste is not classified as hazardous according to the Commission Decision 2000/532/EC
<b>Appropriate disposal /Packaging</b>	Dispose of container and unused contents in accordance with federal, state and local requirements.

### 14. TRANSPORT INFORMATION

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>

<b>14.1 UN number</b>	Not applicable
<b>14.2 UN proper shipping name</b>	Not applicable
<b>14.3 Transport hazard class(es)</b>	Not applicable
<b>14.4. Packing group</b>	Not applicable
<b>14.5. Environmental hazards</b>	Not applicable
<b>14.6. Special precautions for user</b>	Not applicable
<b>14.7 Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code</b>	Not applicable
<b>14.8 Additional information</b>	The product is transported by railway (RID), road (ADR), and sea (IMDG) transport. The cargo is classified as non-hazardous in compliance with the international rules of carriage. Obligatory mark «Keep dry».

## 15. REGULATORY INFORMATION

<b>15.1 Safety, health and environmental regulations/legislation specific for the mixture</b>	
<b>EU regulation</b>	
- European Parliament and Council Regulation 1907/2006/EC, December, 2006, regarding registration, estimation, authorization and restriction of chemicals (REACH); - European Parliament and Council Regulation 1272/2008/EC (CLP) December, 16th, 2008 regarding substances and mixtures classification, marking and packing; - Standard EN 374; - Standard EN 149; - Standard EN 166 - Standard EN 143; - Standard EN 344. Chemical safety reports: Ammonium sulphate, Ammonium phosphate dibasic, Ammonium phosphate monobasic, calcium sulphate	
<b>Other regulations</b>	
This product is not classified according to Regulation (EC) No 1272/2008	

## 16. OTHER INFORMATION

<b>Relevant R- , H-, EUH-phrases</b>	None
<b>Abbreviation</b>	PEL - permissible exposure limit OEL - occupational exposure limit REL - recommended exposure limit DNEL - derived no-effect level PNEC - predicted no effect concentration LD50 - lethal dose LC50 - lethal concentration EC50 - half maximal effective concentration NOAEL - no observed adverse effect level NOAEC - no observed adverse effect concentration PBT or vPvB - persistent, bioaccumulative and toxic or very persistent very bioaccumulative TVA - threshold limit value
<b>Training instructions</b>	Read carefully the SDS before using the product
<b>Further information</b>	The data contained in the safety data sheet is based on the amount of information and experience available to the company at this time.

<b>PJSC SUMYKHIMPROM</b> <b>Safety Data Sheet</b> according to regulation (EC) Nr. 1907/2006 <b>SuperAGRO</b> <b>Inorganic macronutrient fertilizer</b>		
<b>Date : 17.05.2021</b>	<b>Version: 2.9</b>	<b>Supersedes version: 2.8</b>
